

# ReignVault

## Alpha Tester Guide

Part of the Amethyst Reign app portfolio

■ Note: The app interface may still display "SafeSpot" — that's the original name. ReignVault is the new brand. Same app, same link.

## What It Does

ReignVault is a photo-based memory tool. Take a photo of anything you put somewhere intentionally — AI describes the item and its location in detail. Later, search in plain language to find it. Works offline after the initial save.

**App link:** [plumvault.netlify.app](https://plumvault.netlify.app)

### ■ iPhone Setup

#### Quick Setup (~15 min)

##### Step 1 — Create an Anthropic account

Go to [console.anthropic.com](https://console.anthropic.com)

##### Step 2 — Add a credit card

Pay-as-you-go, not a subscription. Typical cost: ~\$1–2 per year total. No recurring charges.

##### Step 3 — Get your API key

Starts with sk-ant- — send it to your phone via Notes, text, or email.

##### Step 4 — Open in Safari on your iPhone

Go to [plumvault.netlify.app](https://plumvault.netlify.app)

##### Step 5 — Paste API key and tap Save

##### Step 6 — Add to Home Screen

Tap the Share button (box with arrow at bottom of Safari) then tap "Add to Home Screen".

##### Step 7 — Optional: Lock Screen shortcut

Via the Shortcuts app — opens ReignVault from your lock screen in one tap.

#### Backup (iPhone — Recommended Monthly)

Your items are stored on your device only. Export regularly so you never lose them if you clear Safari or get a new phone. Export and Restore buttons are in the app settings.

■ Shortcut tip: You can create an iOS Shortcut that opens ReignVault's export screen and reminds you monthly. Ask Robin for the shortcut file if you'd like it.

## ■ Android Setup

### Quick Setup (~15 min)

#### Step 1 — Create an Anthropic account

Go to [console.anthropic.com](https://console.anthropic.com) in Chrome.

#### Step 2 — Add a credit card

Pay-as-you-go, not a subscription. Typical cost: ~\$1–2 per year total. No recurring charges.

#### Step 3 — Get your API key

Starts with `sk-ant-` — copy it or email it to yourself so you can paste it on your phone.

#### Step 4 — Open Chrome on your Android phone

Go to [plumvault.netlify.app](https://plumvault.netlify.app)

#### Step 5 — Paste API key and tap Save

Tap the Settings icon in the app, paste your key, and save.

#### Step 6 — Add to Home Screen

Tap the three-dot menu (■) in Chrome, then tap "Add to Home screen". This installs ReignVault like an app — no Play Store needed.

#### Step 7 — Allow camera access

When you first try to take a photo, Chrome will ask for camera permission. Tap Allow.

### Backup (Android — Recommended Monthly)

ReignVault stores your items in your browser's local storage in Chrome. This means your data lives on your device and is not backed up automatically.

#### To back up your items:

1. Open ReignVault in Chrome.
2. Go to Settings (gear icon).
3. Tap Export — this saves a backup file to your Downloads folder.
4. To restore, tap Restore and select the file.

■■ Android-specific note: If you clear Chrome's browsing data or storage, your items will be deleted. Export regularly to protect your data. Consider moving your backup file to Google Drive or Google Photos for safekeeping. Some Android devices also support scheduling reminders via Google Assistant or Samsung Reminder — set a monthly reminder to export your ReignVault backup.

## How It Works

■ Save	Take a photo, give it a name, tap save. AI adds a detailed description automatically.
■ Find	Search anytime in plain language. Works offline once items are saved.
■ Update	Moved something? Tap Moved It, snap a new photo, and the record updates.

## Limitations (Alpha)

- Internet needed when saving a new item (for AI description generation).
  - API key is per device — each new device needs its own key.
  - Alpha stage — features are being added based on feedback.
  - Android: stored in Chrome only. Switching browsers loses your data.
- 

## Feedback and Support

Questions, bugs, or ideas are always welcome. This is an early-stage tool and feedback genuinely shapes what gets built next.
